

PRICELIST 2014

Klaus Lahr,
President of KBL AG

Made in Germany. Not just a slogan, but also a promise that is guaranteed by our company to the greatest possible extent. The complete development achievements, including the manufacturing of the devices take place in our headquarter in Dernbach. The focus on our strengths allowed not only the development of devices, that represent a perfect combination of material, technology, design and aesthetics, but also a continuous progress towards pioneering devices. Besides quality and outstanding customer services, KBL is exemplary for innovative products.

Energy Saver signifies a decrease in energy consumption. Reduce your energy consumption without a loss of power! Through an optimal application of the latest EVG-technology, an ideal tanning treatment with a minimum of energy can be obtained. Already in 1997 we developed cpi – controlled power integrated – for our customers. This development constituted the first step towards the saving of energy.

Saving energy for the environment – a further essential feature of our idea for sustainable developments.

In 1996, as the first manufacturer of solariums, KBL obtained the **Environment Certificate DIN ISO 14001**, followed by the Environment Certificate for the entire management system in 2003.

In 2008 KBL put down a marker with the environmental label. The latest technology and innovations provide the possibility to use energy, weight and financial resources more efficiently. **For a green world.**

Why all this?
Certainly we have your best interests at heart, but we also feel obliged to a gentle and protective dealing with nature. Today is important, though it is absolutely essential for us to leave a lovable and livable world for our children.

Icons and their meanings

evoSystem2 Novel reflexors for maximised balancing of operations. Purpose built refined surfaces for even higher efficiency, evoSystem2 – Power for a sensation causing, intensive and smooth tan in the facial area.

p2 Röhren p2 – a new type of solarium tubes. Compared to common tubes, this new technology combines perfect tanning results and the formation of vitamin D3. And what is relieving for your customer, it is really gentle on the skin.

electronicPower A bunch of innovative features – that is electronicPower. Electronic ballasts reduce energy consumption of the tubes by approx. 33% in addition to that the weight of the solarium by approx. 100kg. Smooth and safe operation is guaranteed even if the voltage supply is unsteady.

aroma Increase the feeling of well-being with this feature. aroma stays for concentrates in the two fragrances SUNRISE and DAY-DREAM, which are sprayed off. In addition to the aroma function, you will automatically get the cabin-breeze which allows you to fill the cabin with a fragrance.

aquaCool Though two special jets in the canopy (inside on the transparent cover of lamps), which function absolutely drip-free, aquaCool produces a fine mist during the sunbathing – refreshing and revitalizing at the same time.

airCon The high performance air-conditioning system guarantees a pleasant cooling during the tanning session on all megaSun-sunbeds.

cpi Energy cpi energy guarantees less energy consumption, more power and longer lamp durability; it enables the adjustment to all common UV-Standards (only possible with the original lamp equipment) by using the display respectively at the push of a button.

Sun on/off With mon amie the customer has the choice: Utilize the healing power of the sun and gain an attractive tone – or enjoy the pure collagen-light therapy.

ACS Intelligent technology controls the intensity of the ventilation – depending on the room temperature – and also the noise level. At the beginning of the tanning session ACS ensures a gentle-up of the whole ventilation system; at the end of the session it controls the soft boot-down of the burners, tubes and the complete ventilation and aeration system.

USB MP3-songs saved on USB sticks are getting more and more popular. Customers just connect their own USB sticks loaded with the music they love.

preSelection A user friendly display is meant with this feature. It is located at the outside of the canopy. According to personal preferences, features can be selected easily and in a convenient way before sunbathing.

Ruby-Collagen-Booster Genius technology. the collagen fresh-kick can be used on 3 intensity levels even without tanning the face and décolleté.

Bluetooth Listen to one's own music from the smartphone with bluetooth. Only one click, the connection will be ready and the enjoyment increase the tanning session.

colorMotion More than just a decorative light – innovative LED technology with emotions! Choose with the novel touch remote control out of 18 different lighting programs with only one click.

musicVibration musicVibration is the KBL sound system, that makes you feel the vibration of the music. The system generates sound waves from vibration and thus spreads the sound more homogeneous in the tanning tunnel.

megaVoice With megaVoice system you can lay back and relax just from the welcome on. A pleasant voice guides the customer through the manual functions of the solarium; mistakes impossible, well-being guaranteed – just until farewell.

mp3-Sound box The mp3-player can be equipped with any kind of music by each studio operator individually. The mp3-player can be connected by using the audio access.

volumeControl This feature offers acoustic pleasure on constant level. The volume of the internal and external music players is automatically adapted to the loudness of the environment caused by ventilating system.

HPE +36% (High-Performance-Efficiency): more power while reducing energy consumption and heat development.

This pricelist has been effective as of **January 01, 2014.**

All price lists issued prior to this date are no longer valid. The prices listed (in Euro) represent the prices for end consumers. They are based on the quotation 'ex works Dernbach'. We reserve the right to any technical or design modifications as well as changes in price and delivery. All KBL prices stated do not include any timer systems.

Export of KBL products – specified in this catalog – to the USA and Canada, or operation of the systems in these countries, are not permitted. KBL does not accept any manufacturers liability in case this direction is not adhered to. It is expressly pointed out that any violation of the export/operation prohibition will involve substantial risks of liability for the exporter and/or operator.

Technical equipment and versions of the devices are in accordance with the legal prescriptions of the respective country of destination.

Guarantee for KBL-professional Sunbeds + Collariums®

From the point of delivery of the units and for a duration of 6 months, KBL AG guarantees, that by proper use the units are not affected with any mistakes, that may cancel or reduce the value or the ability for an ordinary use (except wear parts like tubes, facials, starters and acrylics). This time span will be extended to 24 months if the guarantee card is filled in and returned within the first four weeks after shipment.

All shipments are based on our general terms of trade.
